

June 9, 2010

Widseth Smith Nolting has been using KIP plotters from CES since 2003 and we are very satisfied with the equipment and the service.

It's one thing to have a piece of equipment that is reliable but it's just as important to have the company that services them to be as reliable and this is one of the main reasons we chose CES. CES has been very professional and courteous when we have made service calls at any of our 6 locations in MN, ND, & SD and I would highly recommend them.

I have worked myself in the printing industry and have dealt with multiple brands of wide and small format plotters and printers and they all break down eventually so then in my opinion that's why it's important to have a good company to support that piece of equipment and that's why I prefer the KIP brand because it's more reliable than the rest, and I chose CES as the company to support them.

Sincerely,

Brent Morris
